WAINWRIGHT, ALBERTA, WEDNESDAY, NOVEMBER 26th, 1913

NUMBER 8

## FEW RATEPAYERS ATTENDED PUBLIC MEETING MONDAY

Not Even So, Meeting Brought out Some Interesting Information.

MANY ENQUIRIES WERE MADE.

Councillors Snyder and Beaudry Briefly Submitted Reports.

Although but a mere handful of ratepayers was in attendance, the report of the year's progress by Mayor Lally, and the information given out by Councillors Snyder and Beaudry, together with numerous queries by the citizens present, made the public meeting on Monday night more of a success than was expected before order was called.

Mayor Lally briefly outlined the year's work and summarized what had been done. Public improvements had not been undertaken on account of shortage of money, and the chief work accomplished was in straightening out financial matters. Laboring under these difficulties, and the fact that councillors had not been regular attendants with the exception of Councillors Snyder and Beaudry, an effort had been made to save the ratepayers' money. It appeared that very little work had been done, but he was of the opinion that the 1914 council would take over the town's affairs in a very satisfactory condition.

Report from the various committees was then made by Councillors Beaudry and Snyder, in which it was briefly pointed out that under the trying circumstances, affairs had gone on very smoothly. In the absence of Councillors A. E. Mills, chairman of Health, Parks and Cemeteries, Secretary Kenny reported on the new system of scavenging which the council had employed.

Numerous were the questions asked by the few ratepayers who attended and H. C. King was among those most prominent in asking the reason for movements in which he thought the Council had not taken a proper course. He was answered by the Town Secretary in most part. Ex-Mayor Pawling was on hand and made interesting enquiries on certain questions, touching financial matters. Frank Lush, whose annual appearance at meetings of this kind is a matter of history, was in line to show his interest in municipal affairs, and it was in regard to the rink and certain minor matters that his curiosity was satisfied. S. E. James enquired as to financial matters with the rink and wanted to know if \$100 represented the total revenue of the rink last year with which interest on investment, capital and insurance were paid. It was explained that this amount only covered the period from January 1st to October 31st. V. E. Graham asked the reason for the Wainwright Flour Mill not being paid the balance due on the loan, and a reasonable reply was given in that stringency of the money market had prevented this being done.

In closing the meeting, Mayor Lally thanked the councillors for their support during the year and thought that from certain standpoints, the year had been successful. He regretted that Councillors Mills and Bowerman could not find it convenient to be present. When the Mayor had finished, Frank Lush made a motion that a vote of thanks be extended the council for the year's progress and especially in straightening

## SUCCESSFUL MAYOR

MAYOR LALLY

whose term this far gives rise to a belief that he has made good, under trying circumstances.

## SUCCESSFUL MEETING OF LITERARY SOCIETY

An Interesting Debate on Strange Subject Held by School Children.

On Friday afternoon last, the Literary Society at the local school held what proved to be one of their most successful meetings, one of the most interesting parts of the program being a realistic representation of the discomforts of the single life by Nellie Dewar, Helen Shirley, Grace Ward and Marion Limpert. This was followed by a recitation by Charlie Ward.

Mr. McLean read the week's edition of the Literary Gazette, the school paper, and it proved of a very interesting and amusing character.

The main part of the program took the form of a debate on the relative merits of life with a rich and stingy man and with a poor and lazy one. Merle Mabey and Ideala Gregory defended life with the poor lazy man, while Helen Limpert and Mr. McLean opposed the proposition. A ballot of the members present was taken, and the opposition proved successful.

Mrs. Carbert, Mrs. Clark, Mrs. Corcoran, Mrs. Ferguson and Mrs. Graham were present for part of the meeting and the committee takes this opportunity of giving an invitation to all interested in school work to attend Friday afternoon's meeting, which commences at 3 o'clock. A Mock Town Council is being planned for Friday.

## TOOL CAR DESTROYED EARLY THIS MORNING

Early Morning Blaze Destroyed Tool Car and Entire Contents.

At an early hour this morning an alarm of fire was rung in for a blazing box car on the G. T. P. tracks. Although a quick response was made by the firemen and citizens it was seen on their arrival that nothing could be done to save it, and the contents consisting of tools, were burned as was also the car to its trucks. The car was on a side track and the yard engine pulled adjacent cars out of danger.

out the financial situation which prevailed at the beginning of the year. Ex-Mayor Pawling was on his feet in an instant, and stated that he did not think it the intention of the ratepayers to make the meeting a "mutual admiration society," and that although the 1913 council had done well a large amount of credit was due Secretary Kenny for the able manner in which he applied his services in the absence of councillors, whose work would otherwise have been neglected.

## DIDN'T KNOW GUN WAS LOADED AND DEATH IS RESULT

P. M. Christensen Accidentally Shot while Cleaning Rifle.

THE BULLET PENETRATED LUNG.

Funeral Tomorrow to be Under Direction of Local I.O.O.F. Lodge

At an early hour yesterday morning, Peter M. Christensen succumbed at his home on Fifth Ave. as a result of serious injuries he received Sunday from the accidental discharge of a 22 calibre rifle he was cleaning. The unfortunate victim of the accident was not aware of the gun being loaded.

While cleaning the gun, the barrel was resting against his stomach and in some account able manner the trigger was pulled. The bullet entered the abdomen, passing through the intestines, the liver and diaphragm, under his heart and through his back by way of the left lung. Dr. Little, whose services were immediately rendered performed a successful operation with the assistance of Dr. McGregor of Irma, and for a time it was thought that the man had some chance of recovery. This however did not prove the case, and he passed away yesterday morning at 7 o'clock.

The late Mr. Christensen came here three years ago from Lexington, Oregon and contracted for sometime before recently entering the employ of the G.T.P. He was aged 63 years and besides a sorrowing wife who remains to mourn his loss, he is survived by two sons, Ernest of Wainwright, and Frank, of Carleton, Oregon.

The funeral will be held tomorrow afternoon from his late residence and a short service at the Methodist Church. Interment will be made with I.O.O.F. honours. The deceased was a past grand in this order and besides the circle of friends he had in the local lodge, scores of other friends in this vicinity will mourn his loss.

Funeral arrangements are in charge of Small Bros., and the service at the grave will be conducted by Rev. C. R. Corcoran, after which ceremonies will be left in the hands of the Odd Fellows.

## SERIOUS CHARGE WAS DISMISSED

Kinsella Farmer Accused of Shooting Cattle was Discharged.

On Saturday last, Constable Wilson arrested Selwyn Smith of Kinsella on a charge of shooting cattle, the property of Frank Murray of the same place. He was brought to Wainwright and arraigned before Magistrate Ross on the same evening. The Crown applied for a remand, which was granted, and on the application of Robert Hunter, who appeared for the defense, bail was granted.

The case came up for trial on Monday night and the charge was dismissed. Three witnesses gave evidence for the Crown. On information of Constable Wilson, the charge was laid.

## METHODIST CHURCH SERVICE

In the absence of Rev. C. R. Corcoran, who was too ill to preach, the services at Grace Methodist Church on Sunday were in charge of Mr. Samuel Lewthwaite and Dr. Little.

## Mrs. Amy Keane Defends Herself in Supreme Civil Court

Former Editor of Chauvin Advance Appears in New Role in Courts.

The Edmonton papers of yesterday contain reports of Mrs. Amy Keane, former editor of the Chauvin Advance, defending herself in the Supreme civil court. She is one of three defendants in action concerning a Mechanics' Lien, one J. P. Cragg claiming from her the sum of \$678 against a building erected in South Edmonton in 1912, shortly after her journalistic demise at Chauvin.

## NOMINATION DAY IS NEXT MONDAY; NO ONE IN FIELD

Developments not Following One Another very Rapidly.

Developments are not following one another in very rapid succession in municipal election matters and nothing has transpired since last week that would in any way indicate who will be in the field. With nomination day five days distant, it does not appear that the vacancies will be very eagerly sought.

There is intimation to the effect that Councillor Snyder will again allow his name to go before the ratepayers and that Councillor Bowerman will not ask endorsement on the 1914 board. Herbert Smith, whose name is popularly mentioned, is not, it is said, adverse to being nominated.

W. E. Simmons will likely be in the field as a school trustee, and his choice already seems favourable to a large number. It is probable that Chairman Dawson of the school board, whose term automatically expires at the close of the year, will consent to stand again.

## COUNCIL W. E. MILLS' RESIGNATION NOT ACCEPTED AS YET BY COUNCIL BOARD

An error occurred in last week's issue, in which it was stated that Councillor Deveson had not resigned and that Councillor W. E. Mills' resignation had been accepted. Councillor Deveson has resigned and his resignation accepted, and Councillor Mills' resignation, although submitted, has not been accepted by the council.

## TAKEN TO PONOKA

After a close observation for a few days by the R. N. W. M. P. at Edmonton, A. Aldridge, who became temporarily unbalanced a short time ago, was taken to Ponoka last week. It is reported that he is improving and that the treatment he is receiving will permit of his departure from the asylum at an early date.

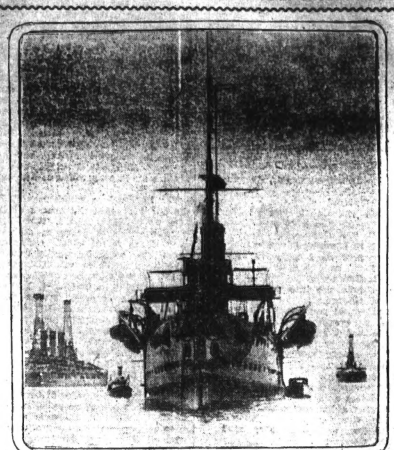

## WILL INSTITUTE LODGE

An I.O.O.F. lodge will be instituted at Edmonton on Wednesday, December 10th., and the ceremonies will be performed by the local lodge, who will go to that place at least thirty strong. Upwards of forty candidates will be initiated into and made members, and Edmonton lodge will start off with a large membership.

## LEAVE FOR FORMER HOME

Mr. and Mrs. B. E. Pense, who were employed with C. T. Lally until Saturday last, left on Monday for their former home in Nebraska, where they will reside in future.

## AMERICAN BATTLESHIPS GATHER IN VERA CRUZ HARBOR

The fact that American battleships are gathering slowly in Mexican waters emphasizes the fact that the American attitude on the Huerta controversy is growing firmer. The United States is making all necessary preparations in the event of a war proving inevitable.

## FORMER MOUNTED POLICEMAN HERE

Ex-Constable Webster Doing Detective Work Near Edgerton.

R. E. R. Webster, who was stationed here in charge of the R. N. W. M. P. detachment for two years previous to his appointment on the detective force with headquarters at Edmonton, arrived here on Sunday and is now working on a separator outrage, similar to that of the Wood Wainwright affair.

It is alleged that a short time ago, Barton Bros., of Edgerton, who have a separator outfit, were victims of an enemy who destroyed belting and otherwise temporarily tied up their operations. This was reported to the police and Detective Webster is now in the vicinity of Edgerton gathering information bearing on the matter.

## YOUNG MEN'S CLUB WAS REORGANIZED

Officers Elected Last Night and Club is Away to Good Start.

Last night in the office of N. S. Kenny & Co., the Wainwright Young Men's club was reorganized and officers and an executive elected. The election resulted as follows:—Hon. Pres., N. B. Walton; Pres., W. J. McLean; Vice-Pres., G. E. Harper; Secretary, H. W. Crampton; Treasurer, C. R. Corcoran; Executive, W. J. McPhee, H. A. Cook, S. D. Mills, N. S. Kenny and C. T. Lally.

## UP ON CHARGE OF GRAFT

A mock Council, in which one of the masquerading councillors will be brought up for graft in connection with purchasing two street lights, is planned by the school Literary Society for Friday afternoon of this week.

## ANNUAL MEETING U. F. A.

The annual meeting of the Green Shields U. F. A. will be held in the school house, Saturday, December 6th, commencing at 7.30 p.m., when the election of officers and other important business will be attended to.

Mr. and Mrs. E. Badke left here on Monday for Winnipeg. Mr. Badke, who has been a machinist at the roundhouse here, will likely be employed in the Transcona shops.

## DOES NOT THINK WAINWRIGHT HAS BEEN NEGLECTED

Dr. Little Believes Government is Unjustly Accused of Partiality.

WAINWRIGHT AND VERMILION.

Claims Government is not Entirely to Blame for not Building Rural Phones.

Editor Wainwright Star, Sir:—

Allow me to pen a few remarks bearing upon an editorial appearing in your issue of Nov. 12th. Before entering into my criticism of this particular article, permit me to say that, with the exception of the one to which I refer, this issue of the STAR contained an exceptionally large number of editorials which to my mind possessed considerable merit.

In your leading editorial, "Expenditures are not Evenly Distributed," you give the impression, I would not say intentionally, that the provincial government has been partial to a certain people around and north of Vermilion, in the matter of telephone accommodation and road improvements, and has neglected the more densely populated district around Wainwright.

I do not think that you mean any great condemnation of the government by your comment but I believe a false impression may be and has been gathered from your criticism. I fear, Mr. Editor, that your search for the real cause of the difference in the conditions which exist in these two districts has been too superficial and you have, more from desire than reason, jumped at the conclusion that the government must be the responsible party. I accept your statement as to the truth of the fact that there is a difference in the advancement of these districts, however, I do not think any injustice has been done to the Wainwright district.

I do not believe it to be the policy of the government to assist to any great extent in the grading of roads, with the exception of trunk roads, but rather to leave this work to the municipalities; but it does aim to build bridges and their approaches wherever needed, and in this respect Wainwright riding has at least received its share.

It is the roads about Vermilion are better graded than those leading into Wainwright, it may be due to one or both of two reasons:—the people of Vermilion must be more enterprising than those of Wainwright or, I would prefer to believe this: the Vermilion district is much older settled than that of Wainwright and consequently has had more time for such improvements. However, I think the roads in this district are very fair.

In regard to the rural 'phone question, it should be shown by this time to anyone who takes any interest in public affairs, that the policy of the government is to build rural lines wherever requested as soon as it can. That request must consist of one subscriber to the mile of 'phone line and as soon as any district can obtain that number of subscribers the government, I venture to say, will build their line, with all possible haste, irrespective of party complexion. Here again I must say, since we have not rural 'phones running out of Wainwright, is due to the less enterprising citizens of this district or is the reason to be found in the fact that this is a

### A Needle in a Haystack

A bottle of yeast was formerly much used in Derbyshire, England, and probably is so still, to destroy a beetle in fodder cattle in a field. When it is difficult to find anything that has been lost the farmer folk would want to say: You may as well hunt for it as for a needle in a haystack of hay.

Some times the rope tied round the hay had a piece of wood with an eye in it at the end, through which the rope was passed to tie up the bundle and a sharp point at the other end, and this piece of wood may have been called a needle; if so, a needle of this kind would have been referred to in the proverbial saying.

### When Tied Together

An Irish couple, whose married bliss was not without a few squalls, a husband and wife, were once tied together by their spiritual adviser regarding their disagreeable quarrels.

His Reverence—That dog and cat you have agreed better than you. The really something that together you soon change your mind.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

### Dressed in Part

The juvenile of Puddingford had opened their cricket season. The day was fine, and the players were in good form; in fact everything was in season, even the disgust of the sharp-featured lady whose garage adjoined the pitch.

Funny thing your boy Jimmy can't play a game without having such ideas, she remarked over the fence to the lady next lot. What's he always want to stand under? Play you can't get something better to do than to find fault, came the reply. He's got to stand under a wire if he likes, I suppose.

Darcey has snatched the sharp-featured lady; she snatched the lady's old man's nightgown off the line to dress himself up in he'll get something that's new and better for the other fellows a chance.

Minard's Liniments Cures Burns, Etc.

Bread and cheese and kisses: They go together, hey? I have met with many a pair who didn't think that way.

### Not Like Patients

A Scotch doctor, new to the gun, ventured upon a day's rabbit shoot.

Chased by the ferrets, bunny was a rather quick moving target, and the medico was not meeting with the success he had anticipated. He was too quick for me.

Three American artists were telling tall tales about their work. "The fall day, said one, I painted a little deal house in imitation of marble with such remarkable accuracy that, on being thrown into the water it immediately sank to the bottom."

Painted, said another. Yesterday I hung my thermometer on the canal supporting my view of the Polar region. It fell at once twenty degrees below freezing point.

All that is nothing, remarked the third artist in conclusion. My portrait of a prominent New York millionaire was so lifelike that it had to be shaved twice a week.

### CANADIAN FORESTRY ASSOC.

Important Work being carried on for Benefit of the Dominion.

Someone has well said "The forests of Canada may grow on the mountain sides, but their roots are deep in the minds of the people."

For centuries the world has witnessed forest destruction going on in the oldest countries. The curse of stunted development and the scorn of modern nations are come upon those who, through, are indiscriminate cutting and over-grazing turn productive areas into barren, and smiling green mountains into stony deserts. The oldest nations are generally speaking, worse off in this regard, but even in the heart of the Eastern States, and some parts of Canada, there are hundreds of thousands of acres of land, now abandoned, with heartbreak and misery written over the ruins of the broken-down houses, and the ruins of the once happy people, driven in the name and rocks of the barren soil. Nature, so kindly in many things had simply refused to accept an improper use of her bounties.

The impressions which prevailed in the old days, that the forests of Canada were inexhaustible, that trees were inexhaustible, that progress, even if the forest should suffer loss, substitutes could be readily found in the forests of the future, are now being replaced by the fact that the forests of Canada are not inexhaustible; in fact, at the present rate of cutting, there is timber enough to last much less than half a century, unless we thoroughly protect the young growth now coming.

But the crisis is not so much to be feared in the consumption of wood as in the destruction of the great Balance Wheel of Nature. Says Gifford Pinchot, Chief Forester of the United States: "The connection between forests and rivers is like that between father and son. No forests, no rivers. The floods and droughts of the Far East, of Sicily, Crete and Spain, the torrents and erosion of France, and the floods and droughts of the Pacific, are due to the destruction of the mountain slopes."

Dr. B. Pennington, M.D., writes: "The great issue as it stands before the people of Canada today: 'When the question of the taxation of forests, of women, of tariff, of taxation, of currency, which are all in the hands of the United States, the secretary of the Ontario Motor League here, in which he urges to assist in the building of the Lincoln Highway, sending contributions to the national headquarters in Detroit, Michigan, because he declares, the Lincoln Highway will benefit Canadians far more than residents in many sections of the United States.'"

"I am writing the lines," says Mr. Elkhart, "to indicate you that I have received from the Lincoln Highway Association a circular asking for contributions to the building of the Lincoln Highway, which will help build a highway from the Atlantic to the Pacific and asking: 'Will you help?' This is a worthy enterprise. I do not think there is a Canadian but who would appreciate making a trip from the East to the Pacific Coast over this highway. I myself have sent a cheque for \$5 and will take pleasure in riding over it some time. If everything falls well with me."

Outside of this I appreciate the opportunity to subscribe a fund in memory of such a grand man as Abraham Lincoln, who was, to my way of thinking, one of the greatest of men, and speaking men ever born, the man who abolished slavery in America. Think how Canada will appreciate this Highway. Automobile owners in the Southern States, or Michigan or Minnesota, no more right to subscribe to this highway than we of Canada. Another reason why Canadians appreciate this highway is because it will be impossible for Canada to build a motor highway with the rough country to contend with between Toronto and Winnipeg, conditions that are not the same in the United States."

I would like to see the Lincoln Highway proposition brought to the attention of the different motor clubs of Canada, and I feel confident that the Canadian people will look upon this subject in a very generous manner. I am a member of the Lincoln Highway Association, born within 18 miles of Toronto.

Not in Scotland. An American was Americanizing in a loud voice and instructing a Scotsman in the way he should go. But the Scotsman to judge by his expression was not taking the lesson very much to heart.

We have the finest men in America, twinned the Yankee, in the world. McBee, replied Sandy, puffing his pipe. We have sent some fine ladies out there from Scotland.

You didn't read George Washington, I reckon, retorted Uncle Sam—the man who is the keynote of our national character today, the man who could not be bought or sold.

Could he not be asked the Scotsman, Mon, there's no miracle to boast about here. Now, we can lie here in Scotland—but we won't.

Why Bait Engines? The sweet young thing was being shown through the locomotive works. What was that thing? she asked pointing with her finger.

That answered the guide, is an engine boiler.

She had an up-to-date young lady and at once became interested. And why do they boil engines? she inquired again.

To make the engine tender, politely replied the resourceful guide.

Indolent. Is Jones here?

Lazzy's no name for it. Why he'll go into a revolving door, and then wait for somebody to come in and turn it around.

The umpire calls a foul, said she, yet not a feather did I see.

Correct! he answered; even so! but

for all time as, he produced on these lands. At present they are a great extent firewood, unworked, unproductive. On these forest areas the forest must be maintained if this nation is to rise to its full development.

This is a democratic country. Our chief pride is the liberty of our people and the freedom of our institutions. On the whole of the majority rests all the structure of our development. The advance of the movement for the economic handling of our forest resource will depend solely on the attitude of the Canadian people. Never was the saying: 'As a man thinketh, so he is,' so truly applicable as to the nation at the present time. If the Canadian people determine to keep the forests from destruction, the water-power from diminution, and the irrigation streams from loss, these things can be done.

Some day the Canadian Forestry Association will not be necessary. The forests of the country will be as carefully managed as the land, or a factory. There will be no waste, no fire, no bankrupting of the coming generation, for the benefit of the present.

At the present time the Association is needed badly. Great as is the progress of forestry in the past few years, there still remains the fact that our forests are burning, our lands are unplanted, our people wasteful.

The Association advocates: 1. The exploration of the public domain, so that lands unsuitable for agriculture may be reserved for timber production. 2. The preservation of the forests for their influence on climate, soil, and water supply. 3. The promotion of judicious methods in dealing with forests and woodlands. 4. Tree planting on the plains and on streets and highways. 5. Reforestation, where advisable. 6. The collection and dissemination of information bearing on the forest problem in general.

Before us lies a great inertia to be overcome. How long will it take through appeals, education, co-operation and stringent laws to make us all careful with fire in the woods? How much must be done to bring about a thoroughly scientific management of all of our timber resources. The Association should be a vital, active, powerful unit, and we should try this gospel of the conservation of the forest of our prosperity into every home in the land. In Canada, and the opinion, conviction, and conscience of the Canadian people behind it, nothing but earnestness and order and stringent laws to make us all careful with fire in the woods? How much must be done to bring about a thoroughly scientific management of all of our timber resources. The Association should be a vital, active, powerful unit, and we should try this gospel of the conservation of the forest of our prosperity into every home in the land. ## WHAT THE OTHER EDITORS SAY

Wedding Bells  
For Ananias

The Story of His "Deep Trouble"

By EDITH L. WINSTON

It was several months after Ananias came to Wainwright that the Widow Rowell told me that she had just learned that Ananias had been married. I asked the widow what she knew about the wedding. She said that she had seen Ananias at the wedding, and that he had been very happy. She said that she had seen him at the wedding, and that he had been very happy. She said that she had seen him at the wedding, and that he had been very happy.

"What you going to wear, Hettie?" asked Maria. "White," replied Mrs. Rowell calmly. "I've thought it all out, Maria. I was white for my first wedding when I married Jesse Jones. Then, being a widow, I wore gray when I married Henry Rowell. Now I feel like I've come back to first place again, and so I've concluded I'll wear white."

"And now, captain, how about you standing up with Ananias at his wedding?" she smiled happily at him. From nowhere in particular came a hollow voice that answered the widow's question.

"Fallsburg!" was his ominous suggestion. The Widow Rowell screamed and closed her eyes. The captain glanced wildly around, and I confess that I was startled. Only Maria knitted on calmly, unconcernedly.

"Why, what was that?" I asked. "What was that?" asked Maria in a surprised sort of way. "Mrs. Rowell sat up, and sparks flashed from her eyes in all directions. Her hair bobbed and she appeared to meet her sharp uprearing chin. "I thought I heard something," she said, still smiling.

## NAMED BY MISTAKE.

That is What Happened to Thysa of Vermont's Town.

It is not often that a town is named by mistake, but about 150 years ago this thing happened—not to one town, but to three towns in Vermont. At that time a grant of land was made by New Hampshire to some Connecticut settlers. This tract then, as now, was divided into three townships—Burlington, on the hillside of Lake Champlain; Colchester, just north, and Williston, east. The three towns were chartered on the same day, and it was at this time that the names were named.

The Burlington family took up their land in the north section (Colchester), and it seems to be true that their name was to have been given the town, so that it should have been called Burlington. Other settlers took up the eastern portion (Williston), and the rest remained in the part by the lake (Burlington). Among these last was the family of Thysa, who were the first settlers in the town of Williston. However, there was so much confusion in the entering of the records by an assessor named John, that the name of Thysa was written as Thysa, and the name of the town was written as Thysa.

## ORIGIN OF BLACKMAIL.

The Term Was Born of Outlawry on the Scottish Border.

The etymology of the expression "blackmail" is historically interesting. It appears to have its origin on the Scottish border and dating from times when frequent political feuds between the homes of the lords of the border lands justified a sort of permanent territorial brawling as between two borderers of each realm.

The word "blackmail" is a combination of the words "black" and "mail". "Black" is a Scottish word meaning "to pay" or "to give". "Mail" is a Scottish word meaning "a payment" or "a contribution". The word "blackmail" is a combination of the words "black" and "mail".

## Marry and Part for a Year.

Among the many peculiar customs prevalent among the people of Central America is that of marrying for a year.

The custom is that of marrying for a year. The couple are married for a year, and if they are not happy, they can get a divorce. The custom is that of marrying for a year. The couple are married for a year, and if they are not happy, they can get a divorce.

## Ways of Business Beauties.

Instead of a coming out party as we know it, the business girls of the United States have a different custom.

The custom is that of coming out. The girls are dressed in their best, and they go to a party. The custom is that of coming out. The girls are dressed in their best, and they go to a party.

## The Cosmic Law.

There is a cosmic law, an economy in nature. Energy is an indestructible matter—no trace of waste anywhere, no economy of nature.

The cosmic law is that of energy. Energy is an indestructible matter. The cosmic law is that of energy. Energy is an indestructible matter.

## No Luckless.

"Any insanity in your family?" asked the doctor.

The doctor asked the question. The patient answered. The doctor asked the question. The patient answered.

## A Quick Switch.

Jack (studying geography)—Father, what is a switch?

Jack asked the question. Father answered. Jack asked the question. Father answered.

## RADFORD'S BUFFALO.

Explorer's Specimen Now On View In Alberta Capital.

Harry V. Radford, the Arctic explorer, who with his companion, Geo. Street of Ottawa, has been murdered by Esquimaux, killed the largest wild buffalo known in June of 1910 on the trip which proved to be his last. He told the story to H. A. Tremayne, then an inspector of the fur trade districts for the Hudson Bay Co. Mr. Tremayne described the white in Winnipeg recently.

"I met Radford at Fort McMurray, on the Athabasca River, in June, 1910, and he told me the story of the killing of this huge beast," says Mr. Tremayne. Then he quotes Radford as saying: "Desiring to obtain a large specimen of the white buffalo, I applied, when at Edmonton, to the Alberta Government for a permit to kill one. This I obtained. I traveled by boat to Fort Smith, on the Great Slave River, in 1909, and remained in that vicinity, pursuing my active investigations, until recently (June, 1910). One afternoon we came upon the spot of a band of twelve animals, among the tracks of which I noticed an unusual size, indicating that its author was a very large animal. We tracked the band for about two hours when it was found to have divided, eight of the animals going south and the remaining four north. One of the large ones traveling northwest. I again took up the trail for three miles, and a single shot was sufficient to bring it down. It was a magnificent specimen of the white buffalo, and I succeeded in traveling on with silence and circumspection for about half a mile, when I found it lying on its side, perfectly still, an enormous bull buffalo and a cow."

The moment was a agonizing one for me, but by a supreme effort I controlled myself, dropped on one knee, and, aiming carefully at the heart region, fired. The bull did not move. I fired again, and with a second shot it fell on its side, and lay struggling. Still fearful that the injuries inflicted might not be vital and that the animal would escape me, I fired three more shots, after which the beast lay quite still. I then went to the animal, and, having procured the scales, found that it weighed the beam of 150 pounds, easily a world record."

The sequel is thus related by Mr. Tremayne: "In reaching Smith's Landing with the carcass Radford was greeted by the presence in charge of a Royal Mounted Police officer, who, in the name of the Minister of Agriculture for the Province of Alberta, the sergeant executed the animal and the carcass was placed in the unorganized district known as the Northwest Territories, which under the Minister of the Interior, and that the permit was therefore of no value. He then told me that the carcass was a misunderstanding, and Radford could not leave the vicinity until he had been given a permit by the Minister of Agriculture for the Province of Alberta. The sergeant executed the animal and the carcass was placed in the unorganized district known as the Northwest Territories, which under the Minister of the Interior, and that the permit was therefore of no value."

## THE NEWEST GAME.

It's Come To Stay Until Snowdrift Time Anyday.

In Toronto these days auto polo is the rage. In the morning before school, during noon-hour, and in fact all the hours, the "auto polo" is the best time of all for the game. Every asphalted residential street from crusty—very much upper crust—Rosedale to cosmopolitan Eglinton swarms with whirling "auto polo" of very late design, driven by young men who fear not women, neither regard they fast. As for the game, they may go bang. On with the game, and if anybody doesn't like it they'd better keep on the side walk.

Getting a "poloauto," last as it is the most popular, is a simple matter. First of all the energetic boy rips off the rollers of the roller skates, which were till recently his pride and joy. These are to be the wheels of his car. Next, he gets a thin board, some two feet long and six inches wide, and he gets a ball of rubber, one on one end and another pair is nailed at the opposite. On the front of the board, a light-colored wooden box, not more than 18 inches wide, but just high enough to reach the knees of the player.

A two-foot stick with a block nailed on the end is the polo mallet, and the player is fastened to the mallet's ragdoll or big brother's foot—serves as polo ball. The player is dressed in a light-colored suit, and he is ready for a game. With two other boys he brings up his car—auto polo is a game for three or four players. The leader of the team is a flaming-patched youth who bears the name "Reddy." Opposite to him is the "Bluey," who is the only one who has soap boxes.

With one foot on the plank, the other on the roller skates, the player is ready for a game. The player is dressed in a light-colored suit, and he is ready for a game. The player is dressed in a light-colored suit, and he is ready for a game.

## DUCK WEATHER.

Mean, Blustery Weather Is Nurod's Harvest Time.

Have you ever crunched in a rush like "duck-blind" with a nose-wetted lashing the slate waters outside until they showed their white flags? Waded there numb and patient with the low-hanging clouds spilling little dark pellets of rain or snow against your face, the white you scanned the drab sky in search of an incoming flock? asks A. P. McKinnin in The Canadian Courier. If you are a duck-shooter you have learned that the best duck day is the one that is dark and stormy.

An old duck-shooter once said to me in answer to my question of how he always knew when to go out after ducks: "Son, I just sit by the fire till the fog gets so thick that I can't see my hand for the rain. Then I go out. That's the way to get ducks. You wait till the fog gets so thick that I can't see my hand for the rain. Then I go out. That's the way to get ducks."

True it is that the ducks, no shy in time of calm, seem to be more trusting when the west wind puffs and the fog gets so thick that I can't see my hand for the rain. They have a choppy sea, a pale snow that uneasy. They are prescient of the storm. During the calm the small flocks join the larger ones until out in the centre of the bay, and then they are scattered in various flocks. Great redheads, kinglets, bluebills, and plump ruddy ducks, all are there. They are all ready for a game. With two other boys he brings up his car—auto polo is a game for three or four players.

## REIGN OF THE SOCKEYES

REMARKABLE RUN IN THIS YEAR LASTED ONLY THREE DAYS.

Every Fourth Year the Fraser River Has an Extra Large Migration to the Spawning Grounds—A Fish Were So Plentiful That Little Boats Would Not Hold Them In This Year's "Run."

Although "run" is the name usually given the annual return of the salmon to spawning grounds at the headwaters of the Fraser, Columbia, and other rivers, there are times when such a term is insufficient, and August of 1913 was one of them, for then the fish didn't run at all—they stampeded, says Hubert Evans in Toronto Saturday Globe.

For three days in that month the sockeyes entered the Fraser River in greater numbers than during the past sixteen years; then as suddenly as they came, they disappeared, and catches of 60 or 70 in one haul of a net dropped to five or ten in just a few hours.

Fishermen maintain and canneries records prove that every fourth year there are five hundred tons of sockeyes in the Fraser River, and that this year was one of them. The sockeyes entered the Fraser River in greater numbers than during the past sixteen years; then as suddenly as they came, they disappeared, and catches of 60 or 70 in one haul of a net dropped to five or ten in just a few hours.

WAINWRIGHT ALTA., WEDNESDAY, NOVEMBER 20TH, 1913

**T**HAT the town's financial condition is in a most satisfactory state of good health is the reality and conclusion that no ratepayer can deny and to which all must come. That the treasury has finally arrived back at that point where the balance sheet is in a more healthy condition than for many a day is something that should give rise to general satisfaction.

In spite of financial depression during the year, when the strictest economy was a necessary practice, Wainwright is now almost free from debt so far as expenses, apart from debenture debt, are concerned. With the sale of debentures to the extent of \$25,000, which will be applied on notes now lying in the banks, a deficit of not more than \$10,000 might be shown at this time. **TOWN'S FINANCES IN MOST SATISFACTORY CONDITION**

By the end of next month it is no wild hope that enough taxes will then have been received to counterbalance this deficit, so as to enable the 1914 council to make a start on a clean sheet, free from debt and owing nothing apart from debentures covering the town's permanent assets in the way of town hall, street grading, sidewalks, skating rink, etc.

By the close of the year, the town should, and undoubtedly will, be far better off than the majority of Alberta towns. Mayor Lally and the 1913 council have done admirably in financing the town's business through such a trying period with the results now apparent. In the curtailing of expenses until money is a little easier, the council has risen to the occasion, and the members, who have taken the shrewd advice given by Mayor Lally on assuming office, are deserving of no small credit for the present showing.

**I**n a communication from Dr. Little, appearing in other columns in this issue, in which he seeks to throw a little light on, and give some explanation for, the Wainwright constituency being more than a few paces behind older and more settled communities, there is one point at least in which his argument is more than mere defence of the provincial government.

The suggestion that the board of trade take up the matter of rural telephone lines is well worthy of attention. This and other matters of equal importance should be in the program for 1914 and should have been agitated long ago. The functions of a board of trade seem doubtful so far as the members of the local body are concerned and why such a dormant state of affairs has been allowed to grow is a question few can understand.

Whoever is in charge of the 1914 board of trade would do well to mark this suggestion of Dr. Little's with an indelible pencil so that it will not be forgotten or passed up when the year's work is outlined.

**S**OME TIME ago the Supreme Court of Alberta quashed three convictions against Edmonton moving picture houses for having operated their places of business on Sunday, contrary to the provisions of the Lord's Day Act. Even though no tickets were sold, a receipt was placed in front of the buildings, in which those entering might drop their money or refrain from so doing, according to their own discretion. No one entering the building was charged an admission fee and was not compelled to pay for his amusement.

The judge could not see where, by not charging admission fees, the moving picture proprietors were infringing on the law. But even so, these proprietors undoubtedly accomplished their **SUNDAY PICTURE SHOWS** object, insofar as they **SHOULD NOT BE PERMITTED** might have been endeavouring to gradually work into the same practice as is being followed in other parts of the continent, where Sunday performances are permitted and not interfered with by the law. The ruling of the presiding judge will give other picture houses in the province some grounds for keeping open their places of amusement on Sunday, providing the same conditions in the way of an admission price exist. The practice under this precedent may become so common that recent legislation must be employed.

Enough time during the week is afforded the public to attend picture shows and the picture house proprietors for making money, without desecrating the Sabbath Day. Sunday is not observed as a day of rest to a sufficient extent now, without other influences to increase this carelessness and degenerate the Lord's Day.

**T**HE growing importance of and the increased interest in woman suffrage suggests many things and not the least of these is the place in the minds of men that women really holds. Since the time of Father Adam, woman has been blamed for many things. Even the first man laid his troubles to and blamed his wife for eating of the forbidden fruit. With great eagerness did he charge that Eve was responsible.

And the course of time since then has proved that man has not changed in his attitude toward woman. Woman has been blamed for almost every trouble man has fallen heir to. She has been responsible for legions of human sins and on **MAN BORN TO COMMAND; WOMAN TO OBEY** her must rest the blame in the eyes of the world. It is useless for her to complain for she is a member of the weaker sex and is supposed to shoulder more than her share. But these are rules to which there are many exceptions.

The higher standard of women who lay claim to equal suffrage are in a sense entitled to it. Since unchronicled ages, she has held the whip hand in many respects, but not in the most important. Man was born to command and woman to obey, but why should this be a matter of equal import to both? But to give the right of the ballot to those who deserve it would draw many women within the radius who would not know how to use it after the position they have held in the eyes of men for so long a period of time.

ALBERTA BLOCKTHE CHURCH AND  
SOCIAL QUESTIONS

Statement Adopted by General Assembly of Presbyterian Church.

Continued from last week

4. "For the abolition of poverty."

"We realize that some poverty is due to vice, indolence or imprudence; but on the other hand we hold that much is due to preventable disease, uncompensated accidents, lack of proper education, unemployment, insufficient wages, and other conditions for which society is responsible and which society ought to seek to remove.

We believe in the maintenance of a standard of living, such that every person shall have sufficient air, light, food, shelter, comforts and recreation to make the conditions of his life wholesome. We believe that whenever possible, he should be led to earn these for himself and those dependent on him, but that, when through old age, accident, sickness, or any other incapacity, the family or individual is unable to become self-supporting, society should make adequate provision for them.

5. "For the protection of childhood."

"We believe in the right of children to birth, health, happiness, and moral education. We believe in the protection of children from exploitation in industry, trade and amusement, and from work that is dwarfing, degrading or morally unwholesome.

Continued next week

Synopsis of Canadian Northwest Land Regulations.

**T**HE sole head of a family, or any male over 18 years of age, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Office or Sub-Agency for the district. Entry by proxy may be made at the office of any Local Agent of Dominion Lands, not sub-agent, on certain conditions. "Sixteen months residence, non-removal, cultivation of the land in each of three years. A homesteader may live within one mile of his homestead on a farm of at least 80 acres, or certain conditions. A habitable house is required in every case, except when residence is performed in the vicinity."

In certain districts a homesteader in good standing may, pre-empt a quarter-section along his homestead. Price \$3 per acre. Duties—Six months residence in each of six years from date of homestead entry, including the time required to earn homestead claim, and to earn crop cultivation. The area of cultivation is subject to reduction in case of rough, rocky or stony land after report by Homestead Inspector for patent.

A homesteader who has exhausted his homestead and cannot obtain a free exemption may take up public land in the same manner. Price \$3 per acre. Duties—Must reside six months in each of three years, cultivate 40 acres and erect a house worth \$200.

W. W. CORY

Deputy of the Minister of the Interior  
N. B.—Unauthorized publication of this advertisement will not be paid for.

## NOTICE

On and after thirty clear days from the date of this notice, that is, on and after the 23rd day of December, 1913, the available quarter sections in the following townships will be open for entry by the first eligible applicants—

and municipal engineering.**HUGE IMPORTS  
FROM THE STATES**We should keep at home more of  
the \$415,000,000 That Goes Across  
the Line AnnuallyAccording to a Washington govern-  
ment report the United States during  
the fiscal year 1912-13 exported \$415,  
000,000 worth of goods to Canada, an  
increase of \$86,000,000 over the pre-  
vious year, and of nearly \$200,000,000  
over the year before that. That is to  
say, in three years our imports from  
the republic have practically doubled.  
In that period our purchases of Ameri-  
can freight and passenger cars have  
jumped from \$500,000 to \$5,332,000;  
our imports of automobiles from \$2,  
558,000 to \$9,250,000; copper pigs, bars,  
etc., from less than \$1,000,000 to over  
\$5,000,000; steel rails, from less than  
\$1,000,000 to \$4,000,000; cotton  
cloths, from \$750,000 to \$2,500,000; lo-  
comotives, from \$250,000 to over \$1,  
000,000; structural iron and steel, from  
less than \$2,000,000 to over \$9,000,000;  
metal-working machinery, from \$332,  
000 to \$2,333,000; agricultural imple-  
ments, from \$1,252,000 to practically  
\$7,000,000; pipes and fittings, from  
\$1,500,000 to over \$4,000,000; leather  
boots and shoes, from \$1,250,000 to  
over \$2,000,000; and illuminating oil,  
from about \$500,000 in 1910 to over  
\$1,000,000 in 1912.Now that the United States has  
overaken its internal demand for  
manufactures, its industrial concerns  
are entering more decisively into the  
competition for foreign markets. But  
for a protective tariff Canada would  
have been the first to feel and suffer  
from that policy. Even as it is, the  
course of trade shows that the con-  
tingency of the Dominion has to a con-  
siderable extent counterbalanced the effect  
of import duties. No patriotic citizen  
wants to see the Dominion exchanging  
raw materials for manufactured  
products. His desire is to have these  
raw materials utilized in Canadian  
industries.It will be a great thing for Canada  
when we can produce and manufacture  
a greater proportion of this \$415,000,  
000 worth of goods here at home.  
The proved policy of moderate pro-  
tection is our chief guarantee that we  
shall be able to do so. It is forcing  
American capitalists to invest millions  
of dollars in industries all over  
Canada.**FACTORIES COME  
BECAUSE OF TARIFF**How the Canadian Policy of Moderate  
Protection Brings  
IndustriesIf the American manufacturer es-  
tablishes a branch, let us say in  
France or Germany, he may do so  
because he has to meet the peculiar  
tastes and demands of a people who  
want the article made their way or  
at least in a different way from what  
appeals to the tastes and meets the  
conditions of the American customer.  
He may also be lured by the in-  
convenience in distributing to a coun-  
try on the other side of the world from  
his factory.But he is not compelled to establish  
a branch factory in Canada by the  
above reasons, either of which might  
be effective in the case of countries  
upon another coast. He has an  
identical constituency in Canada and  
the United States. When he comes  
to Canada he does not manufacture  
differently to meet any peculiar taste  
or demand. So far as pleasing his  
trade is concerned he has no difficulty  
in selling in Canada what he man-  
ufactures in the United States.Neither have we observed any  
oceans three thousand miles wide be-  
tween the United States manufacturer  
and the Canadian consumer. The  
manufacturer can distribute to Cana-  
dian customers just as conveniently  
from Boston or Minneapolis as he can  
from Halifax or Winnipeg.It is moderate protection which pre-  
served the Canadian home market. The  
American manufacturers say that they  
build factories here because they can-  
not manufacture in the United States,  
yet the duty and complete in the Cana-  
dian market with the Canadian man-  
ufacturer. They probably know what  
they are talking about.Is your husband cross? An  
irritable, fault finding disposi-  
tion is often due to a disorder-  
ed stomach. A man with good  
digestion is nearly always good  
natured. A great many have  
been permanently cured of  
stomach troubles by taking  
Chamberlain's tablets. For  
sale by all dealers.**COFFEE AND BAKING POWDER**Ask for BLUE RIBBON products and see that your  
dealer gives them. All BLUE RIBBON goods are guaran-  
teed to satisfy. If otherwise you may return them. BLUE  
RIBBON coffees and baking powder are the best on the  
market or they couldn't be sold with so strong a guarantee.**THE PARK HOTEL** -- HACKER BROS. Proprietors

Use Diplomacy

A certain gushing lady took her

four-year-old daughter to a photo-

grapher. The little one could not be

made to sit still. The camera man

was as nice and suave as he could be

and called the child all the sweet, en-

dearing names he could think of,

while using every device of persuasion

to make the little wriggle keep still.

Finally he turned to the daughter

and said: "Sweetie, if you will leave your

darling alone with me a few minutes, I

shall be sure of getting a perfect

shot. The mother withdrew for a short

time. Soon the photographer rum-

ored her back and exhibited a high

satisfaction negative. When she reached

home, she told her husband: "The

photographer said that the little girl

was a perfect little angel. He said

that she was a perfect little angel."

## Molecules are Invisible

Yet Their Tracks Through Space Can

Be Discerned

It came to me about the middle

of the last century that, in order

to explain certain facts connected with

the relative weights of gases, matter

must not merely consist of atoms, but

that these atoms must have the power

of uniting in small groups. In form-

ing a compound, indeed, this must be

so. For instance, carbonic acid gas

must consist of one atom of carbon,

which, along with two atoms of oxy-

gen, forms a small group of three

atoms.

The novelty of the conception was

in the notion that oxygen itself, in

the state of gas, as it exists, for ex-

ample, in the air, consists of small groups

of atoms. In this case, two. To such small

groups of atoms was given the name

molecules. A molecule is that portion

of a substance which can exist in the

free state, as oxygen does. Molecu-

les generally exist in combination,

but atoms may and sometimes do ex-

ist separately, in which case they are

termed monomolecules.

Now, can molecules be seen? Is their

existence a mere assumption? The an-

swer to that question is, No, they can-

not be seen, but their tracks can be

made which correspond as closely

to their behavior of real molecu-

les. The tracks of molecules can be

seen, though no one has ever seen a mole-

cule, still the track of a molecule mov-

ing through space has been seen, and

the tracks of molecules can be seen, and

the tracks of molecules can be seen, and

the tracks of molecules can be seen, and

the tracks of molecules can be seen, and

the tracks of molecules can be seen, and

the tracks of molecules can be seen, and

Don't waste your money buying strengthening plasters. Chamberlain's Liniment is cheaper and better. Dampen a piece of flannel with it and bind it over the affected parts and it will relieve the pain and soreness. For sale by all dealers.

### WAINWRIGHT MATERNITY HOME & Emergency Hospital

1 block North of School  
A perfect home for ladies during confinement. Special attention given to patients from the country. Terms reasonable. Conspicuous cases not accepted.

Mrs. G. M. Mitchell

"There could be no better medicine than Chamberlain's Cough Remedy. My children were all sick with whooping cough. One of them was in bed had high fever and was coughing up blood. Our doctor gave them Chamberlain's cough remedy and the first dose eased them, and three bottles cured them," says Mrs. R. A. Donaldson, of Lexington, Miss. For sale by all dealers.

Mrs. Russel Long, who visited her parents, Mr. and Mrs. Chas. Lusted for a few weeks, returned to her home in Rivers on Monday.

### In Church Circles

1. The Woman's Missionary Society of St. Andrews church held its regular meeting on Thursday of last week at the home of Mrs. N. S. Kenny, and will hold its next meeting at the home of Mrs. John Sutherland on 2nd Ave.

2. The Ladies Aid will conduct a sale on Friday of this week as referred to in another column of this issue.

3. At the evening service last Sabbath, Dr. W. J. McQueen gave an interesting report of the Sunday School Convention held in Edmonton a few weeks ago.

### THE SOCIAL QUESTION CONTINUED

The sermon on Sabbath evening dealt with the stability of the marriage bond in the light of Christian teaching. The question is raised, "Must the family give way to the idea of the Socialistic state?" or must the Socialistic state adjust itself to the family?

For Christian Socialists, Christ must be the final authority. Christ's teaching regarding the permanence of the marriage bond is unmistakable. Mat. V; 31; XIX; 2-9; MK. X; 2-12. In Christian teaching, there is only one alternative to the permanence of the marriage union, that is, no marriage. Christ countenances neither contemporary nor consecutive polygamy.

The point of emphasis in Jesus' teaching is against the provoking of separation with a view to marriage. If this teaching looks uncompromising in the light of custom, it is to be remembered that Jesus viewed the marriage bond, not from the standpoint of some unfortunate, isolated cases, but in its general bearings and influence on the social order. To him the expansion of those graces and virtues which are born and matured in the uncorrupted and uninterrupted bonds of the family.

The mind of Jesus is that the normal relation for every man and woman is that of the family and it must be retained in purity and integrity, and therefore, whatever social reconstruction may be attempted, it must be adjusted to the inviolability of the home.

The next discourses in this series will deal with the social use of wealth.

**FURNISHED ROOMS** - To rent, warm and comfortable, furnace heated. Apply Mrs. Jas. Ward, Main Street.

### DOES NOT THINK WAINWRIGHT HAS BEEN NEGLECTED

(continued from page 1)

more recently settled district than that of Vermilion? The cause certainly does not lie with the government. It is true that we would like to have seen the long distance line extended to Chauvin, but owing to the financial depression the world over, the government has been compelled to curtail its progress of construction all over the province. However, the construction of rural lines rests with the people largely, and no matter from what sections of this great province the request for rural lines comes, the cause of delay by the government will be lack of money, time and men.

It strikes me that an excellent line of work to be taken up by the local board of trade would be the taking in hand of the circulation of the application for rural lines, among farmers of this district. Indeed such work should not be beneath the dignity of our representative and much more valuable to the constituency than opposing the government in its endeavour to give good legislation to the people of this province.

My desire, Mr. Editor, is not for controversy in writing this article, but rather to place the facts before your readers as I see them and to correct, in part, what I believe to be the false impression which has gone forth from your pen.

I thank you, Mr. Editor, for the publicity which I believe you will be kind enough to give this by publishing it in your valuable paper.

J. A. Little, M. D.

### OBITUARY

The death occurred on Saturday last of Mrs. Juliana Nether-ton, aged 68 years, after a lingering illness from bright's disease. The late Mrs. Nether-ton is survived by four sons, two in B. C. and two in Ontario, and a sorrowing daughter, Mrs. Fred Gordon, at whose home she passed peacefully away. Interment was made on Monday, a short service being preached at the house by Rev. A. Russell.

### A NEW GAME JUST OUT

There is a new game called, "Tickle the Editor." You take an ordinary sheet of paper, on which you pen a few lines suitable for the occasion. Next you fold it carefully, enclosing in the fold a check or post office order, sufficiently large to cover all arrears and a year or more in advance, and hand it to the Editor. Keep an eye on him, and if a smile adorns his face the trick works fine.—Ex.

S. G. Lewis, hardware merchant of Chauvin and E. C. Hass, manager of the Imperial Lumber Co. at the same point, were business visitors here on Monday.

W. B. Crawford, who was confined to his home through a severe attack of la grippe is around again. Mrs. Crawford, who sustained injuries recently in a runaway accident, is steadily improving.

### PUBLIC NOTICE

A Sitting of the District Court will be held at WAINWRIGHT on WEDNESDAY, DECEMBER 3rd, commencing at 10 a. m. Dated at Edmonton, November 22, 1913.

L. F. CLARRY,  
Deputy Attorney General

Notice is hereby given that the time for the reception of tenders for the construction of a Drill Hall at Edmonton Alta., is extended to Friday Nov. 28 1913.

By order,

R. C. Desrochers,  
Secretary,  
Department of Public Works,  
Ottawa, November 17, 1913.

### LOCAL ITEMS OF INTEREST

#### SPECIAL FEATURE FILMS

A special feature will be shown in six reels at the Elite on Saturday evening only. This is entitled "Cleopatra" and will prove an interesting photo play. Children 15c. Adults 25c. One show only.

#### ARRIVAL OF THE STORK

William Schwab, the third Avenue tailor, is wearing a smile as a result of the arrival of the stork at his home on Friday morning last. It's a girl.

#### RETURNS WITH CAR OF CATTLE

S. R. Bowerman returned here last week from points in Ontario and brought back a car of fine cattle. Although cattle are scarce in that province, Mr. Bowerman may go east shortly after another carload.

#### CARDS FOR CHRISTMAS

Private greeting cards for Xmas and New Year's are being ordered in great number at the Star. We have 250 up-to-date styles to choose from. If you have not ordered do so at once.

Mr. and Mrs. S. E. James were week-end visitors to Edmonton, returning here on Monday.

#### OFF TO LE PAS, MAN.

W. S. Goulet, who went west last week with the intention of going through to Fort George, returned on Wednesday and left the same night for Le Pas, Man. to investigate matters before locating.

#### AUCTION SALE OF STOCK

An auction sale of cattle, comprising two year old heifers and milch cows, and horses, machinery, etc., will be held on Monday next, December 1st, at R. Wakefield farm north of town.

#### ON TRIP TO THE ORIENT

Quon Hall, who is better known around the King Restaurant as "Slim" has returned from China after more than a year's absence. His partner, known as "Fat," started on his journey to the Orient on Sunday.

#### SHOULD BE SUCCESSFUL

Friday's dance will be a successful affair, judging from the interest being taken in it by all local trippers. Barker's orchestra, of Edmonton, will be in attendance.

Weather permitting the skating rink will open for the season on Monday night, December 1st. Admission free.
